HighLevel certified: Workflow Automation Expert · Funnel Building Expert · AI Employee Specialist · Course & Community Expert

PROFESSIONAL SUMMARY

HighLevel-certified GoHighLevel specialist with 5 years of professional experience and 58 client systems delivered across the roles and freelance work below, for businesses in the United States, Australia, and the United Kingdom. Beyond standard CRM implementation, I build the custom software most GHL contractors cannot: production web applications on Next.js, Firebase, Stripe, and the Anthropic Claude API, wired back into GoHighLevel by webhook so the CRM and the application stay in sync automatically. My flagship platform, Coach OS, is live and open to review before any interview, and my portfolio runs an AI twin that answers questions about my work.

Availability: Available for remote part-time roles, contracts and fixed-scope builds, with flexible hours that overlap Australian business hours.

CORE COMPETENCIES

GoHighLevel: Sub-accounts, snapshot engineering, SaaS mode, pipeline and workflow architecture, A2P 10DLC registration and compliance, calendars, forms, funnels, memberships, two-way webhook sync.

Automation & Integration: n8n, Zapier, Make, the GoHighLevel v2 API, direct REST APIs and webhooks; idempotent handlers, signature verification, and failure-path design so automations survive real users.

Custom Development: Next.js (App Router), React, TypeScript, Firebase Firestore with security rules, Stripe one-time and subscription billing, Vercel hosting and cron, Upstash Redis.

AI: Anthropic Claude API for streaming chat, prompt caching, answers grounded in a fixed fact sheet, and a fallback on every call so an outage never shows a broken page.

Design & Conversion: Figma to live build, conversion-focused landing pages and funnels, mobile-first layouts verified at 375px and 320px before ship.

Delivery & Operations: Slack, ClickUp, GitHub, scoped milestones, end-to-end testing before handoff, written documentation with every build.

FLAGSHIP BUILD: COACH OS

A complete client-management platform for one-to-one coaching practices, designed and built from zero and wired into GoHighLevel in both directions. Live tour at coachos.johnboydesign.com/tour, written case study at johnboydesign.com/coach-os.

30,275 lines of code · 26 pages · 36 API endpoints · 10 scheduled jobs · 84 email templates · 26 GHL webhook events

- Full Stripe subscription lifecycle: payment succeeded, payment failed, and cancellation, each with its own recovery path and webhook signature verification.
- In-browser e-signature with permanent clause snapshots, enforced write-once at the database security-rule layer, with branded PDF output.
- AI client companion on the Claude API that answers from each client's own history, with hard-coded fallbacks so a failed API call never shows a broken page.
- Coach dashboard with per-client health scoring and revenue attribution, computed from already-loaded data with zero additional queries.

PORTFOLIO AI TWIN (2026)

The chat on johnboydesign.com, built on the Claude API, with a voice intro and an animated portrait.

- Answers only from a fixed sheet of verified facts, cites the facts it used, and never names confidential clients.
- Contact gate with signed 24-hour passes, daily caps per email, per connection and site-wide, and a hard spend ceiling.
- Every failure path returns a working message with a way to reach me, never a broken chat.

PROFESSIONAL EXPERIENCE

GoHighLevel Specialist, Automation
Apr 2026 - Present

Confidential client (NDA) · Remote

- Build and maintain GoHighLevel workflow automation, extended with n8n, Zapier, and Claude.

GoHighLevel Systems Builder
Mar 2026 - Present

Chaos to Closing · Remote, United States

- Built the client's entire business inside GoHighLevel from scratch, centred on social media lead capture and ManyChat nurture sequences.

Lead Flow & Funnel Operations Specialist
Dec 2025 - Feb 2026

Wrldinvsn · Remote, project engagement

- Built end-to-end lead tracking from first click to close, so no opportunity was lost between tools.
- Designed high-converting landing pages and VSL pages optimised for lead capture.
- Engineered an automated booking system with calendar sync, reminders, and cancellation handling.

Lead GHL Automation Architect
Sep 2024 - Oct 2025

K Australia Design · Remote, Australia

- Engineered scalable GoHighLevel infrastructure that let the agency onboard unlimited clients with zero technical friction.
- Built always-on multi-channel nurture automation across SMS, email, and voicemail drop.
- Managed A2P 10DLC registration and messaging logic to protect deliverability.
- Integrated one-click booking and CRM triggers that turned inquiries into confirmed appointments automatically.

Freelance CRM & Automation Consultant
Jan 2024 - Present

Independent · Remote, US, AU and UK clients

- Delivered 13+ of those systems as an independent consultant, in GoHighLevel, for med spas, real estate teams, coaches, and chiropractors.
- Specialised in full GHL migrations, snapshot creation, and SaaS-mode setup for scaling agencies.

Senior Design & Systems Strategist
Feb 2021 - Jun 2023

Masterpiece Las Vegas · Remote, United States

- Developed conversion-focused UI/UX strategies and connected lead-capture forms to automated CRM workflows.
- Optimised marketing funnels by pairing visual design with data logic to lower lead costs.

EDUCATION

Bachelor's Degree in Computer Science
2013 - 2018

Manila, Philippines
