Summary

HighLevel-certified GoHighLevel specialist with 5 years in CRM and automation, in GoHighLevel since 2023, building client systems for businesses in the United States and Australia. I also build what most GHL contractors can't: production web apps on Next.js, Firebase, Stripe and the Claude API, wired back into GoHighLevel so the CRM and the app stay in sync.

Available for remote part-time roles, contracts and fixed-scope builds. Part-time, 4 hours a day, starting at 8 AM in your timezone.

Live projects

Tapline

Repairs desk for Australian property managers and UK letting agents. My own demo, with fictional data.

- Takes a repair from the tenant's report to the bill: AI triage with the property's history, after-hours dispatch, owner approval and invoice checks.
- The AI suggests and a person decides. Emergency wording is fixed and checked, and each market has its own trades, notice periods and compliance rules.
- A real signed webhook you can break yourself: forged and replayed requests are rejected, retries are never applied twice, and failed events wait in a log.

Try the guided tour → How it works

Coach OS

Client-management platform for one-to-one coaches, built from zero and wired into GoHighLevel in both directions.

- Full Stripe subscription lifecycle with webhook signature checks, in-browser e-signature with write-once records, and an AI client companion on the Claude API.

30,275 lines of code · 26 pages · 36 API endpoints · 10 scheduled jobs · 84 email templates · 26 GHL webhook events

Experience

GoHighLevel Specialist, Automation, Confidential client (NDA) — Apr 2026 to present

Remote

- Details under NDA.

GoHighLevel Systems Builder, Chaos to Closing — Project, ended Mar 2026

Remote, United States

- Built the client's entire business inside GoHighLevel from scratch, centred on social media lead capture and ManyChat nurture sequences.

Lead Flow and Funnel Operations Specialist, Wrldinvsn — Dec 2025 to Feb 2026

Remote, project engagement

- Built end-to-end lead tracking from first click to close, so no opportunity was lost between tools.
- Designed landing pages and VSL pages for lead capture, and an automated booking system with calendar sync, reminders and cancellation handling.

Lead GHL Automation Architect, K Australia Design — Sep 2024 to Sep 2025

Remote, Australia

- Engineered scalable GoHighLevel infrastructure that let the agency onboard new clients without technical work each time.
- Built always-on nurture automation across SMS, email and voicemail drop, and managed A2P 10DLC registration to protect deliverability.
- Integrated one-click booking and CRM triggers that turned enquiries into confirmed appointments automatically.

Freelance CRM and Automation Consultant, Independent — Jan 2022 to present

Remote, US and AU clients

- CRM and automation work since 2022, in GoHighLevel since 2023.
- Client work in this period includes Chaos to Closing, Wrldinvsn and K Australia Design, listed above.

Automation and CRM Support, Virtualasting — Feb 2021 to Jul 2024

Full-time, Manila

- Lead engagement: Masterpiece Las Vegas, as Senior Design and Systems Strategist, Feb 2021 to Jun 2023.
- Developed conversion-focused UI/UX strategies and connected lead-capture forms to automated CRM workflows.
- Optimised marketing funnels by pairing visual design with data logic to lower lead costs.

Skills

GoHighLevel

Sub-accounts, snapshots, SaaS mode, pipelines and workflows, A2P 10DLC, calendars, forms, funnels, memberships, two-way webhook sync.

Automation and integration

n8n, Zapier, Make, the GoHighLevel v2 API, REST APIs and webhooks; idempotent handlers, signature verification and failure-path design.

Custom development

Next.js, React, TypeScript, Firebase Firestore with security rules, Stripe billing, Vercel hosting and cron, Upstash Redis.

AI

Anthropic Claude API: streaming chat, prompt caching, answers grounded in fixed facts, and a fallback on every call.

Design and delivery

Figma to live build, mobile-first layouts, Slack, ClickUp, GitHub, end-to-end testing and written documentation with every build.

Certified

HighLevel: Workflow Automation Expert · Funnel Building Expert · AI Employee Specialist · Course and Community Expert

Education

Bachelor's Degree in Computer Science, Manila, Philippines — 2013 to 2018
